

Test Timetable 2022-2023

This is the planned Test Timetable for the 2022-2023 ANQAP test panels but please note that it may be amended to reflect sample panel availability should that be required. Any changes will be communicated to participants prior to the dispatch of samples.

For dispatch dates and due dates for reporting results, please refer to the timetable below. If samples are not received within 5 days for Australian laboratories and within 10 days for international laboratories, please contact ANQAP. Results may be reported before the due date that is listed on the timetable.

Results reported after the due date will not be accepted. Laboratories reporting results after the due date will not have their results analysed or classified, however a “General Report” will be issued to those laboratories to allow them to compare their results with the median and the consensus interpretation reported by other laboratories for that test round. The General Report will not be personalised.
